

Vivontic takes over digital work before it becomes an internal burden.

Many operational workflows are still too dynamic for full automation — but too expensive to handle internally.

Vivontic delivers managed remote workforce execution with leadership, QA, and measurable output.

How Managed Delivery Works →

Not a Tool
No software replacement promises.

Not Consulting
No endless strategy decks.

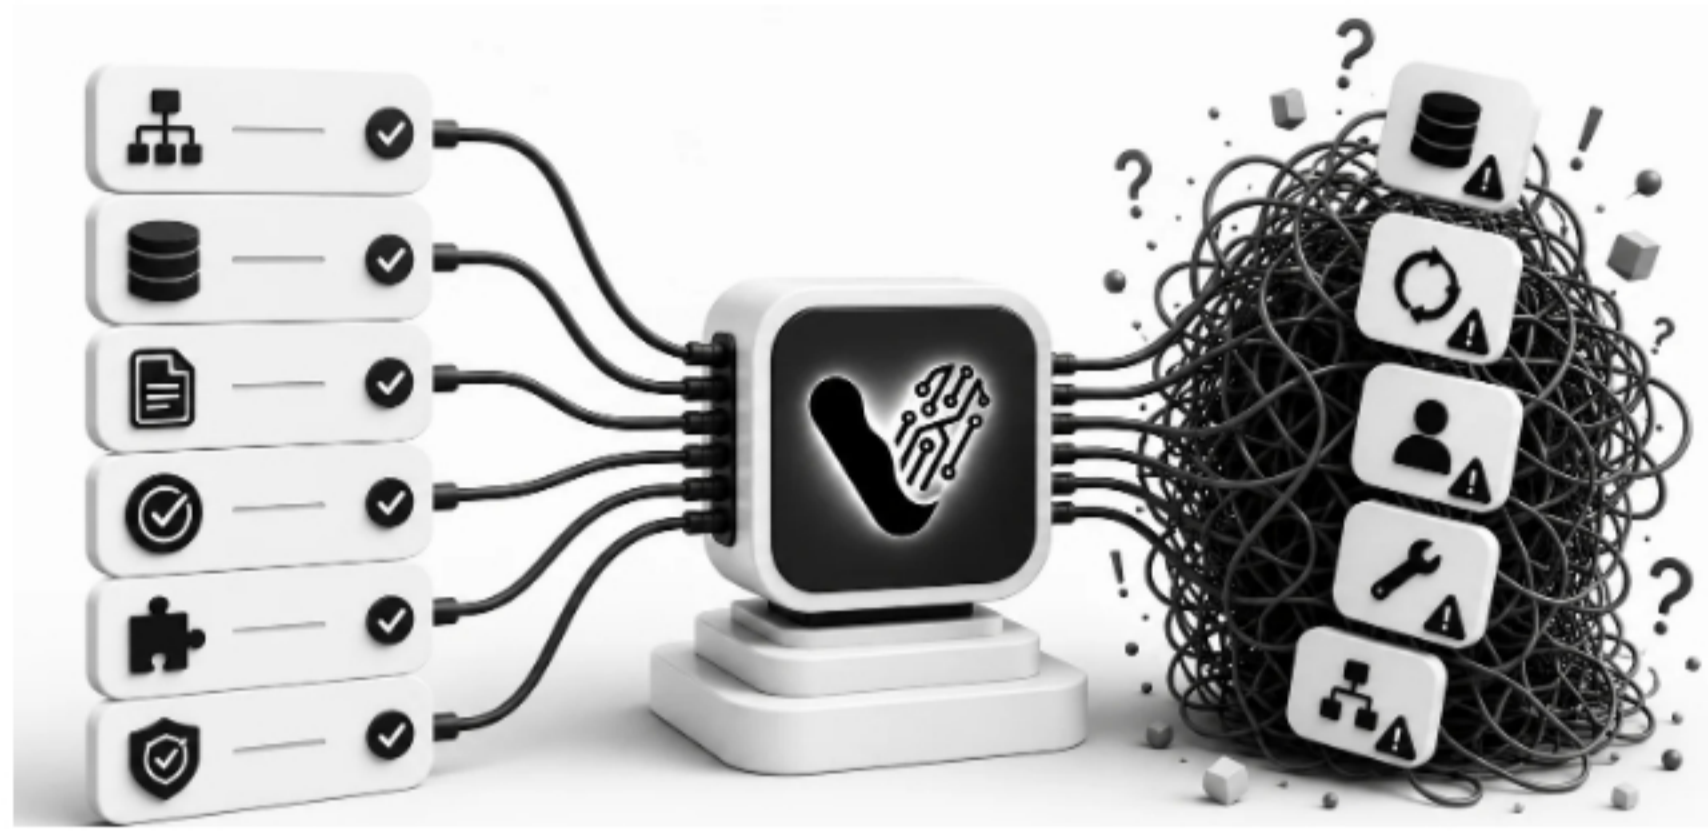

Managed Digital Workforce
Operational execution with measurable delivery.

AI automation requires mature processes.

AI NEEDS

- ✓ Stable workflows
- ✓ Clean structured data
- ✓ Clear rules
- ✓ Few exceptions
- ✓ Integrated systems
- ✓ Reliable QA

AI changes work. Execution remains human.

REALITY INSIDE COMPANIES

- ✗ Incomplete data
- ✗ Constant process changes
- ✗ Manual exceptions
- ✗ Existing legacy tools
- ✗ Human decisions
- ✗ Unstable workflows

DEATH VALLEY OF ENTERPRISE AI

~5%

Only around 5% of companies today achieve substantial AI success.

The Vivontic Model

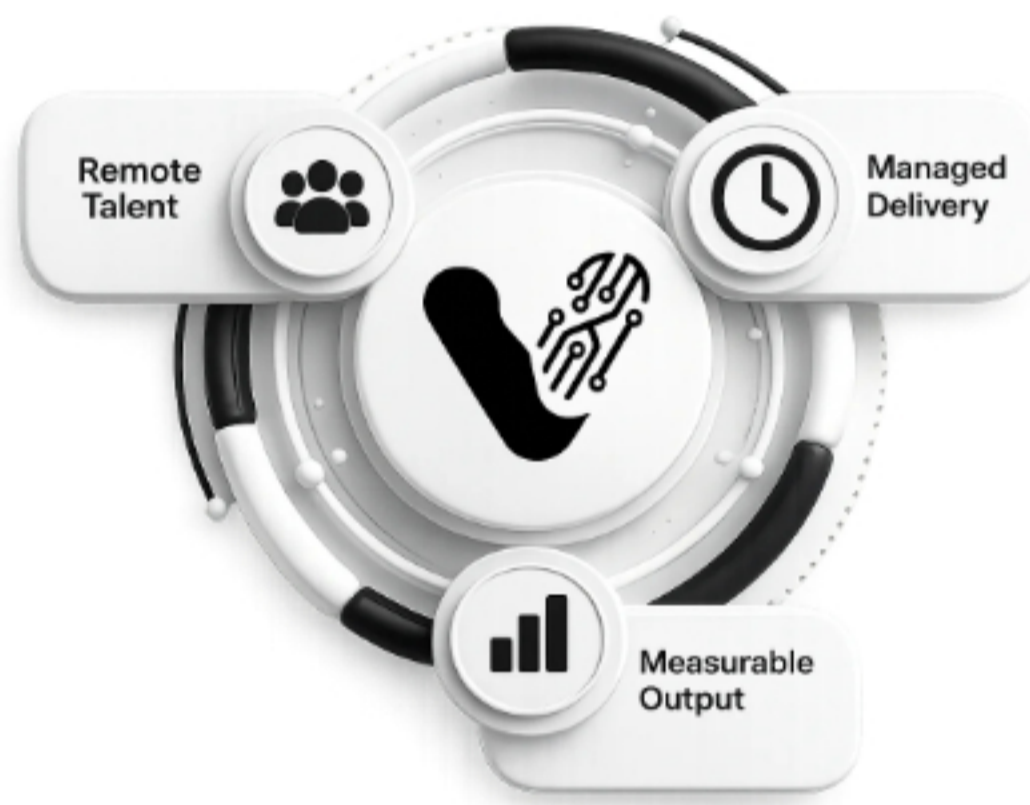

Remote Talent
Operational roles, tech specialists, AI support teams.

Managed Delivery
Leadership, playbooks, workflows, QA, operational control.

Measurable Output
Completed digital work with transparent execution.

Role Spectrum

Operational Work

- ✓ CRM / ERP Support
- ✓ Data Entry
- ✓ Research
- ✓ Backoffice

Tech & Quality

- ✓ Developers
- ✓ QA Engineers
- ✓ Testers
- ✓ Data Analysts

E-Commerce & Content

- ✓ Product Data
- ✓ Listings
- ✓ SEO / GEO
- ✓ Localization

AI Training & Data

- ✓ Data Annotation
- ✓ Prompt QA
- ✓ AI Evaluation
- ✓ RLHF Support

The customer does not buy resources. The customer buys completed work.

From Workflow to Measurable Output

1

Define the Task

Identify the operational workflow creating internal pressure.

2

Launch the Team

Vivontic deploys managed specialists with operational leadership.

3

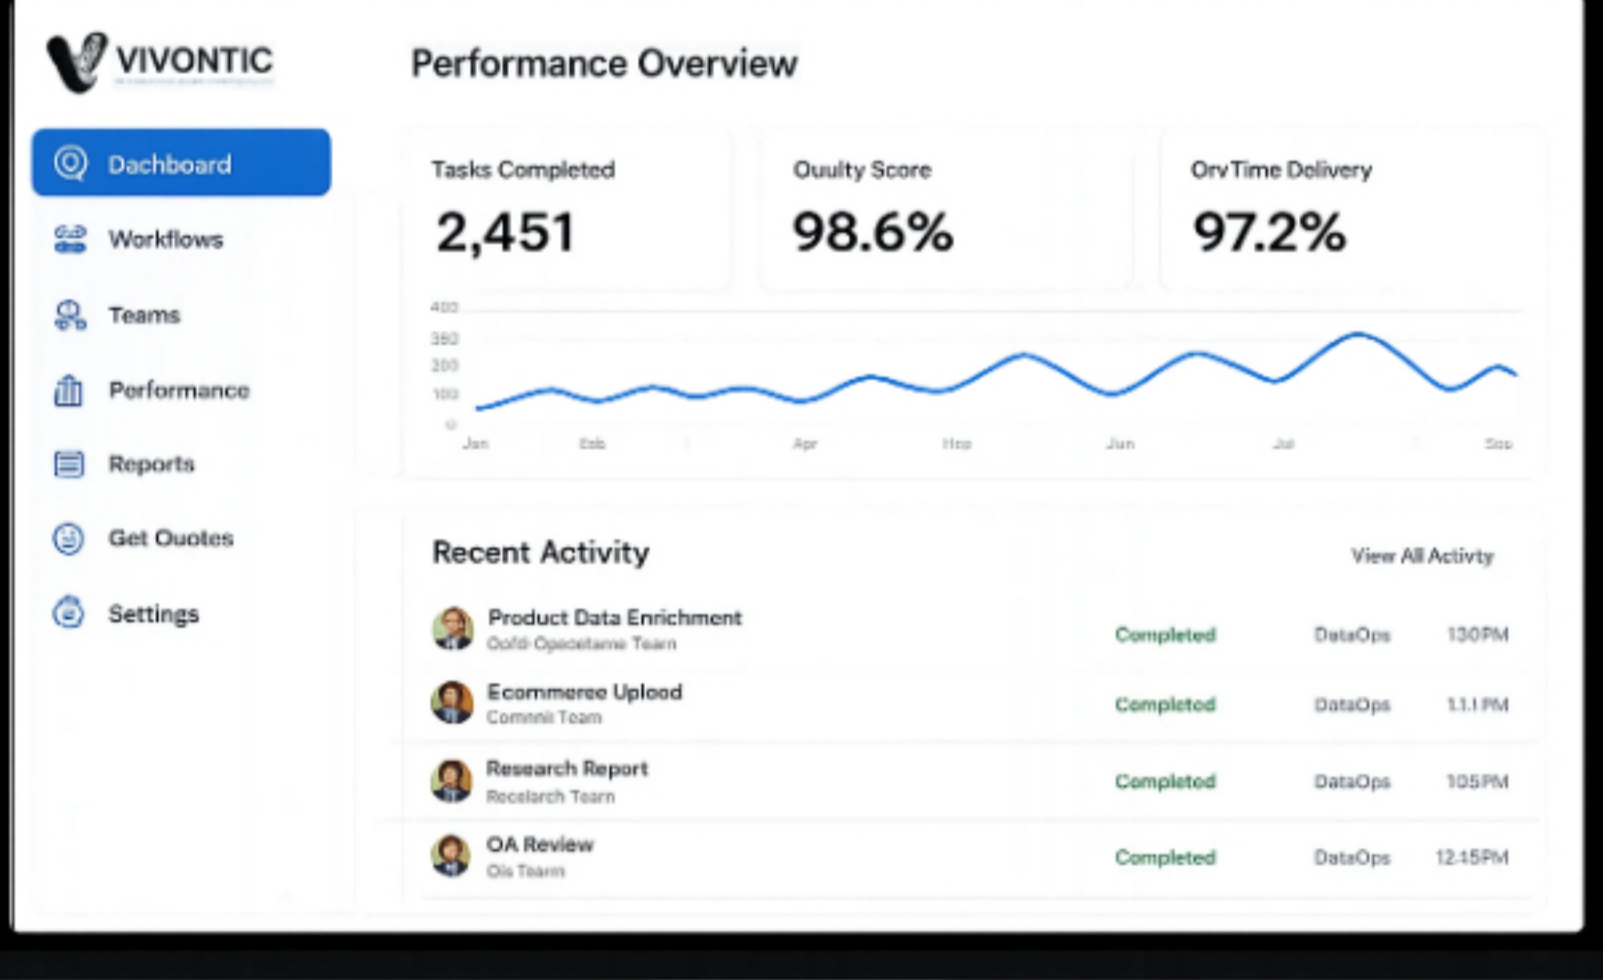

Deliver Output

Receive measurable results instead of operational overhead.

Managed Delivery is the Difference.

Typical Outsourcing Problems

- ✗ No ownership
- ✗ No quality control
- ✗ Fragmented freelancers
- ✗ Poor communication
- ✗ Inconsistent output

Vivontic Managed Delivery

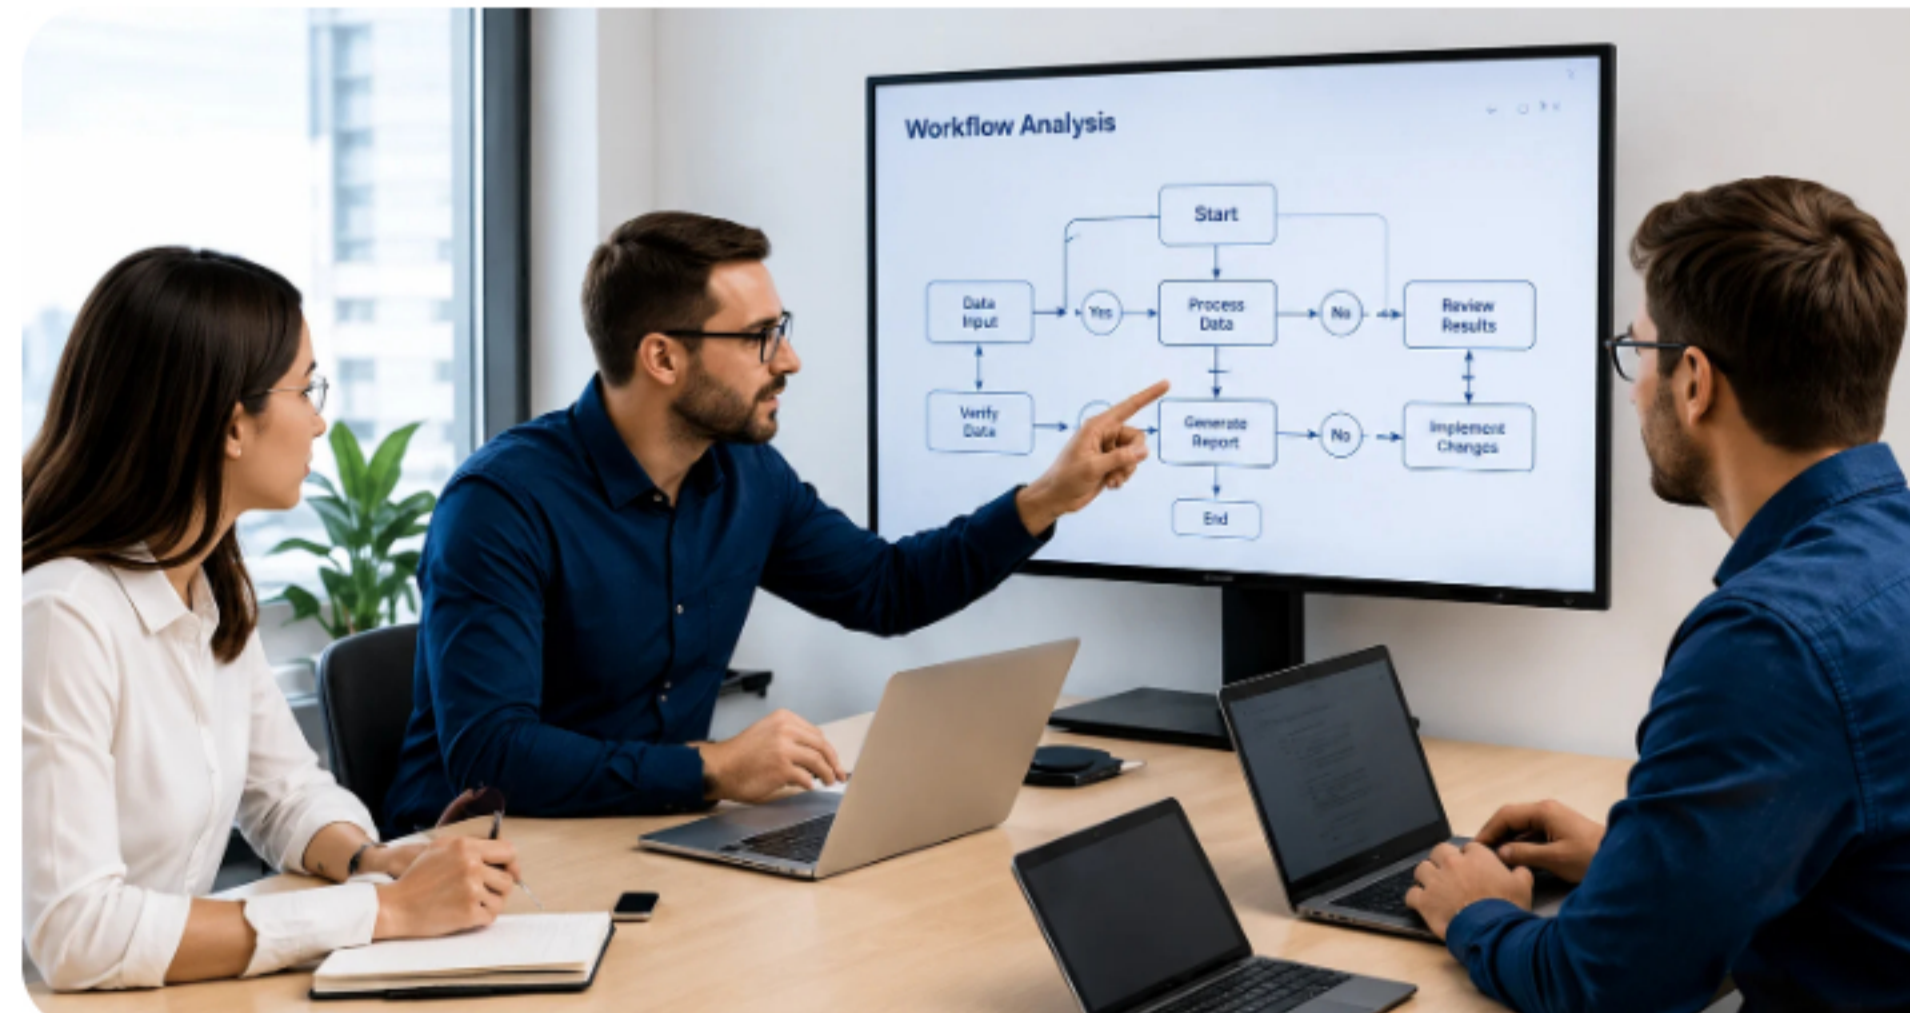

- ✓ Operational leadership
- ✓ Structured workflows & playbooks
- ✓ QA systems and quality checks
- ✓ Performance visibility
- ✓ Scalable execution

Start with one workflow.

Show us one operational workflow that currently consumes time, capacity, or internal resources.

We identify where manual execution still exists, where automation is not ready, and where delivery creates immediate leverage.
